

IN SCHOOL PROGRAMS 2018-2019

Wicked Cool For Kids is happy to present in-school programming. Our STEAM-based enrichment offerings will bring wicked cool science to your school. Empower your students with science literacy and an unforgettable hands-on experience. Our science and technology programs align with **Next Generation Science Standards** and promote a fun, experiential learning environment!

Our in-school programs put the fun into inquiry-based learning while integrating national standards for meaningful outcomes. We can put together a custom topic-based program for two to six hour-long sessions.

Design your own STEAM program by choosing from the following disciplines:

Earth Science Chemistry Engineering
Physical Science Life Science

"We would definitely work with Wicked Cool for Kids again to help bring science content alive!"

Gary Reese, Ed.D.,
Superintendent
Amesbury Public Schools

"This class is awesome! When are you coming back?"

Aiden, 5th grade
